

DTP ENGINEERING STANDARDS INDEX

IDX STD 0001

PURPOSE

This Index represents the "DTP Engineering Standards Baseline". This index is updated and published at the start of each month. Please refer to date of "Last Updated" in the Standards Index and Archived Standard Index sheets.

It identifies:

- 1) Each Engineering Standard owned and managed by DTP*.
- 2) The meta-information (Version, Publication Date, Status, Custodian) associated with each Standard.
- 3) DTP's legacy, archived and superseded standards.

It intended that this index:

- Be referenced into project documentation like Client Requirements Documents (CRDs),
- Be used to confirm the latest version of Standards
- Be used to access Standard meta-data (Custodian Information, Owner Information, etc.)

CONTENTS

This Index contains entries for the following types of engineering documentation:

- Directives
- Standards
- Codes of Practice
- Specifications
- Test Methods
- Bulletins
- Manuals
- Guides
- Notes

This Index also identifies:

- Backdated to 2019 Standard Specification Legacy / Archived Standards and Superseded documents.

This Index does NOT (yet) identify:

- All Standard, Typical or Component Drawings (for Road and particularly Rail)
- All Legacy, Archived, or Superseded Documents

IMPORTANT NOTES

Note1: This index does not yet list drawings for the rail domain. Please visit DMS for access to the latest rail Standard, Typical and Component Drawings.

Note2: Non-ITS Specifications for the road domain are not yet listed in the index. Please refer to the 'Contract Specification' page on the VicRoads website.
