Index of Technical Notes

Technical Note 000
August 2023
Version 22.0

1 Scope

Technical Note 000 provides an Index of Technical Notes relating to pavements, geotechnical and construction materials. These Technical Notes are advisory documents that were current at the time of publication, and provide information on a targeted technical subject or topic about best practice and/or latest techniques used within the road making industry. Withdrawn Technical Notes (not listed) are considered to have contained content which has been superseded or is readily available in documents published by others e.g. Austroads.

Department of Transport and Planning Index of Technical Notes		
TN	Technical Note	Issue Date
1	Cementitious Mortars and Grouts	May 2008
6	Treatment of Cracked Asphalt Over Concrete Pavements	October 1998
7	Flowable Fill	May 2008
9	Steel Furnace Slag Aggregate	October 2011
10	Coating of Concrete	May 2008
11	Sulphide-Bearing Source Rock	October 2007
12	Additives Used in Crushed Rock	October 2007
13	Vertical Moisture Barriers	October 1995
16	Anti-Graffiti Protection of Concrete	May 2008
18	Treatment of Flushed Seals Using Chemical Solvents	June 2006
20	Reducing Reflection Cracking Over Jointed Concrete Pavements	September 1997
22	Acid Sulphate Soils	March 2013
23	Pre-Spraying of Sprayed Seal Surfaces	June 2006
24	Interpretation of Piezo-Cone Penetration Tests	August 1998
25	Embankment/Landslip Repair Using Expanded Polystyrene	June 2006
30	Alkali Silica Reaction in Concrete	May 2008
33	Management of Structures Coated with Lead	April 1999

34	Supplementary Cementitious Materials (SCMs) in Concrete	April 1999
36	Rock Slope Routine Maintenance	June 2015
38	Cracks in Concrete	December 2010
40	Construction of Embankments Over Weak Ground Using Lightweight Fill (Expanded Polystyrene)	June 2006
42	Using Polish Resistant Aggregate	March 2018
44	Pile Capacity Using the Pile Driving Analyser	July 2000
49	Hot In-Place Asphalt Recycling	June 2001
55	Durability of Concrete - Construction Factors	February 2003
59	Performance Levels for Surface Texture	May 2002
60	Skid Resistant Surfacing	May 2002
61	Non-Destructive Testing (NDT) of Concrete in Structures	December 2010
62	High Pressure Water Retexturing	November 2002
63	Use of Fibre Composite Materials in External Strengthening of Concrete Structures	December 2002
65	Factors Used in the System for Prioritising Bridge Maintenance Works	December 2002
67	Fire Retardant Chemicals for Use in the Protection of Road and Bridge Assets from Bushfires	October 2003
68	Brick Masonry Structures	November 2003
69	Surveillance, Inspection and Monitoring of Fibre-Reinforced Polymer Composites	November 2003
70	Treating Pavements Subject to Complex Prior Treatment	June 2004
71	Achieving Good Ride Quality	June 2004
72	Cementitious Repair of Concrete Structures	June 2006
73	Self Compacting Concrete (SCC)	June 2006
78	Guide to Planning Geotechnical Site Investigations	June 2006
79	Monitoring Slope Stability	December 2015
80	Soil Slope Routine Maintenance	June 2015
82	Top Down Cracking in Melbourne Pavements	March 2007
85	Selection of a Treatment for Flushed Sprayed Seals	October 2007

87	Bituminous Surfacing - Stripped Seals	June 2007
89	Test Methods for the Assessment of Durability of Concrete	October 2007
92	Groundwater in Cut Excavations	October 2007
93	Groundwater Sampling and Analysis	November 2007
95	Investigation of Contaminated Sites	March 2008
96	Risk Management of Road Geotechnical Hazards	April 2022
97	Concrete Structures in Marine and other Saline Environments	May 2008
98	Reporting In Situ (Field) Air Voids in Asphalt	December 2010
99	Use of Geocomposite Drainage Systems	September 2008
102	Fire Damaged Reinforced Concrete – Investigation, Assessment and Repair	April 2011
105	Asphalt Surfacing of Concrete Bridge Decks	July 2011
106	Surveillance of Field Density by Nuclear Density Gauge	September 2011
107	Use of Recycled Materials In Road Pavements	July 2023
108	Selection of Rehabilitation Treatments for Granular Pavements	November 2015
109	Pavements in Poor Condition	June 2018
110	Measurement and Interpretation of Skid Resistance using a SCRIM® Machine	November 2018
111	Understanding VicRoads' Skid Resistance Investigatory Levels	November 2018
112	Removal of Pavement Markings	October 2020

Document Information

Criteria	Details
Document Title	Department of Transport and Planning Index of Technical Notes
Authorised by	Senior Manager - Roads Engineering
Release Date	August 2023
Replaces	April 2022 v21.0
Contact	StandardsManagementRD@roads.vic.gov.au

Document History

Version	Date	Description
22.0	August 2023	General update including removal of references to various withdrawn technical notes
21.0	April 2022	TN 96 Revised and re-issued

Interpretation

In this document, except where the context otherwise requires—

- The word “must” is to be understood as denoting a requirement which is mandatory.
- The word “should” is to be understood as denoting a requirement which is not mandatory but recommended.
- The word “includes” in any form is not a word of limitation. Mentioning anything after “includes” or similar expressions (including “for example”) does not limit what else may be included.
- A reference to a section, clause, schedule or appendix is a reference to a clause of or schedule or appendix of this document.

Nomenclature

Where any of the following symbols are used within this document, the textual description provided to the right is its intended meaning:

① This symbol intends the accompanying text to be read as INFORMATION. Common information accompanying this symbol includes RATIONALE and GUIDANCE for the associated requirement.

Copyright
